

You ADD the adjective to the noun,
and it modifies the noun;
it changes it!

Adjectives are always
with their nouns or pronouns.

Let us modify the noun *street*:

narrow street cobblestone street
wet street shady street busy street
noisy street deserted street

With adjectives we do not have to learn
thousands of nouns for different kinds
of bridges or streets.

We just learn the nouns *bridge* and *street*
and then modify them with adjectives.

Adjectives also modify pronouns:

She is **sensitive**. He is **alert**.

It is **crowded**. It is **ancient**.
