

SIMPLE

The old house had a turret with a blue cupola.
The house had a small balcony above the door.

COMPOUND

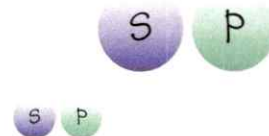

The east side had two tall windows,
and it also had two doors on the ground floor.

The balcony was not large,
but it was beautiful with an elaborate railing.

You could see the canal from the window,
or you could see city hall from the balcony.

The building was old; it has been renovated.

COMPLEX

Since the building had been completed,
it had never been painted.

Visitors had to climb the stairs
if they wanted to reach the balcony.

The first floor was not dark
because it had so many windows.
